# 307-037

Imperia Series

## UPVC Panel

The classical doors of doortech meet the tastes of those who furnishes its interior elegance and traditional values. But it adds a touch of sophistication even to modern environments and style. The interplay of light and shadow on the geometric surfaces creates a dynamic visual effect, enhancing the door's overall aesthetic appeal.

# 100-005

Vera Series

UPVC Panel

Patina Oak - 005

Our vera series, which creates a striking style for your living spaces with a different interpretation of modern design, meets Doortech users. With new color of Doortech accessories, you can add surprise to your spaces. Black and Orange color tone combination.

# 100-005

Vera Series

UPVC Panel  
Patina Oak - 005

The overall design theme of your home can also dictate whether you should match your home door colors and design with door handles and other accessories. If your home has a busy design with lots of colors and textures, keeping things simplistic when choosing your handles will elevate your home's design. On the other hand, a sleek, minimal, and modern home would benefit from cohesive handles to keep the theme going but look fantastic with standout handles that bring variety to the house

# 441G-001

Diamond Series

## Lacquer White PVC Coating on 6mm MDF Panel

We put a lot of passion into consistently designing new decorations and models, each one distinguished and crafted with painstaking care for details, to contribute with style and elegance to all interior door designs, paying the utmost attention to our customers' wishes and expectations, which we heed with commitment, day after day.

# 638-039

Premium Series

Pure lines, a simple and stylish design and a smooth, almost velvety surface.

Well-designed wall paneling can add personality to any setting, from the dining room to the lounge, and even the bedroom. In small settings, it can decorate with style without having to fill the room with bulky furniture or other accessories. To achieve a striking decorative effect with wall paneling remember to use it sparingly. choice a Simple framing on the door leaf and the use of minimal decorations is better option for greater effect in the colorful and decorated interior space.

# 619-001

Premium Series

12 mm MDF Panel

Our mission to produce excellent interior doors which will become part of homes that are furnished with the finest style and taste.

# 614-042

Line Style from **Premium Series**

6mm MDF Panel

Quartz Gray-Super Matt

It's an extremely flexible neutral color. Timeless Elegance; The elegant lines add a timeless touch of elegance to your home doors. The soft textures and finely crafted details create a sense of luxury and modern style that withstands passing trends.

# The Dynamic Role of Hue in the Natural Environment

Whether taking in the splendor of a vivid rainbow against the dark Gray-blue of thunderclouds after a summer thunder shower or closely examining an iridescent butterfly wing, color plays a major role in our fascination with the natural environment. The voluminous brown of a female pheasant or that flash of white from a fleeing deer as it gracefully bounds through the underbrush all colors play a key role to ensure the survival that particular organism. Without those characteristic pigments, evolution would have phased out the unsuccessful colors and chosen the more successful ones.

Color theory is a science and art unto itself, which some build entire careers on, as color consultants or sometimes brand consultants. Knowing the effects color has on a majority of people is an incredibly valuable expertise that designers can master and offer to their clients.

New design of **Premium Series**

# Harnessing the Power of Color in Design.

Color selections are important in design because they help to communicate ideas, create an atmosphere, and direct user involvement. Through the strategic application of color psychology, designers may optimise the efficacy of their designs.

Color is one of the fundamentals that design is built of. It can be a powerful tool in the expert's hands affecting numerous factors that are vital for the compelling visual perception. Color has a significant impact on our minds.

# 310-045

New Collection of **Imperia Series**

White Gray - 045

Elegant details and surfaces that  
are pleasant to the touch

**White Gray** is an off-white color and part of the Whites Collection. As a warm, understated color, White Sand appeals to both traditional and modern design styles. Create a neutral backdrop to traditional design spaces using this off white color or pair with a deep color for a high-contrast look.

# 633-043

Premium Series

## New collection of Surface

**Naval Blue-043** is a dark shade of the color blue. Naval blue got its name from the dark blue (contrasted with naval white) worn by officers in the Royal Navy since 1748 and subsequently adopted by other navies around the world.

## 312-039

New collection of **Imperia Series**

### Modern and Eye-Catching Designs

The doortech doors collection, in the stylish modern-imperia series, reflects the modern taste of those in search of linearity and a touch of originality. The simplicity of the geometric lines engraved in the door creates a delightful game of lights and shadows, which is more pronounced in the band decorations and gentler in the linear decorations, yet it distinguishes the leaf in a unique manner.

### Permeability; Playing with the light

A major advantage of glass doors is their light transmission, as the transparent room dividers make rooms appear larger and brighter. Before installing a glass door in the living room, you should consider how much transparency you want. The decision depends on the adjoining room and the light source. Clear glass ensures maximum light transmission, while doors without glass offers more privacy. If you experiment with the different levels of transparency, you can find the perfect balance between light and living space.

Doortech allows glass doors(Diamond Series) to coordinate with other doors of Doortech (Imperia series) and create a stunning visual aesthetic.

### Transform your home with modern interior doors

The different manufactured products you come across are achieved through several machining processes. Machining processes form the foundation of modern manufacturing industries because of their capability to shape other materials into final products for consumer use.

The first machining stage involves creating a conceptual idea of the required finished product. It involves making the engineering drawing and blueprints of the preferred part, specifying the intended dimensions. However, it is crucial to consider every material's machinability and mechanical strength when determining the dimensions.

In the production process of door handles, precision machining is an indispensable part. Our company has introduced advanced processing equipment and technology to ensure the processing accuracy and consistency of each door handle part. Whether it is the cutting of the flat plate part or the hole processing of the connecting screws, they are all subject to strict precision control to ensure the quality and stability of the product.

# Classic Color Schemes that Never Goes Out of Style

Classic color palettes can enhance home decor by creating a cohesive and timeless look. For example, using a wood-effect surface, white and dark colors can add beauty to a living room. To double the warmth of a classic space with bold, attractive colors.

6mm MDF Panel  
Lines style from Premium Series

Minimalist decor is, unsurprisingly, the antithesis to maximalist design where every element of your scheme is loud and bright in color, awash with statement prints, and full to the rafters with dominant furniture forms and attention-grabbing accessories.

Minimalist style is its far quieter, laconic and sparse sibling. But that doesn't mean to say it's lacking in confidence. To the contrary, a minimalist interior is a self-assured depiction of design and personal preference. Its very essence is about focusing on a few, specifically selected items in a room—pieces chosen with deep consideration and conviction.

A complete line of profiles designed as a solution to various problems caused by laying the floor. The profiles for floors solve different situations: differences in height between new and old coverings, connection between surfaces of the same height with the same or different materials, edge ends, or decorate the room with a simple aesthetic function. The profiles created are characterized by numerous materials and finishes so that they can be easily combined with any type of floor: ceramic, marble, wood, vinyl or others. The incredible variety on offer products to be used during installation or after laying. Furthermore, in the case of renovations, there are numerous profiles designed for installation on existing floors. Their versatility and the wide range of materials and finishes make them the ideal choice to complete your floor, whatever it is and whatever style you want to give it.
